-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 13 December 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-10, 13, 22-24 and 26 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-9, 22 and 23 is/are allowed.
- 6) ☒ Claim(s) 10, 13, 24 and 26 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Art Unit: 3731

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 24 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watt-6578571 in view of Gahwiler-4844512.

Watt discloses a device having a mouthpiece 6, a spacer 10 an adaptor 4 having a rigid end for snap fitting to 10 and a stretchable, flexible end (amounting to a boot) to attach to various sized and shaped medication dispensers, such as MDI's and nebulizers. However, the adaptor is not disclosed as having an engagement flange to engage inner sidewalls of the spacer. Gahwiler discloses that snap fit connectors were known to have an engagement flange 38 for engaging inner sidewalls of the element it is connecting to. It would have been obvious to have provided the snap-fit connector of Watt with a flange in order to provide a reliable connection while allowing for later removal.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140

Art Unit: 3731

F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 10 and 13 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 10 of U.S. Patent No. 6363932.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the application claims are merely broader in scope than those of the patent. All of the elements of claims 10 and 13 can be found in claim 10 of the patent. The only difference lies in the fact that the claims of the application use the term "spacer", while the claims of the patent use the term "tower". As the tower member would inherently act as a spacer, to have used "spacer" would have been obvious. Additionally, the term "spacer" is deemed to be anticipated by the term "tower" and therefore the application claims are broader. As the application claims would therefore constitute a generic invention and the tower claims would constitute a species of that generic invention, then since it has been held that claims 10 and 13 are anticipated by claim 10 of the patent, they are not patentably distinct from claim 10 of the patent.

Claims 24 and 26 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 10 of U.S. Patent No. 6363932 in view of Watt-'571 and Gahwiler-'512.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the application claims are merely broader in scope than those of the patent with the exception that they also recite that the connector is a pliable boot connector and the flange engages the inner walls of the spacer. All of the elements of claims 24 and 26 can be found in claim 10 of the patent. The only differences lie in the fact that the claims of the application use the term "spacer", while the claims of the patent use the term "tower". As the tower member would inherently act as a spacer, to have used "spacer" would have been obvious. Additionally, the term "spacer" is deemed to be anticipated by the term "tower" and therefore the application claims are broader. As the application claims would therefore constitute a generic invention and the tower claims would constitute a species of that generic invention. Further differentiating the flexible connector end of the patent claims as being a pliable boot would have been obvious, as Watt discloses a connector may be formed of a stretchable or flexible material which can distort to cover the drug delivery device dispensing end. This would be equivalent to a pliable boot; incorporating such a connector end would allow the connector to connect to a myriad of different dispenser ends. Gahwiler discloses that it was known to provide a snap-fit connector with a flange which engages the inner wall of the device it is connecting to. It would have been obvious to have provided the

Art Unit: 3731

connector of the claims as modified by Watt with a flange in order to provide a reliable connection while allowing for later removal.

Therefore, the claims of the application are not patentably distinct from those of the patent.

### ***Response to Arguments***

Applicant's arguments filed 12/13/2005 have been fully considered but they are not persuasive.

Watt discloses in col. 7 lines 40-60 a connector configured to adapt to different shaped and sized drug delivery dispensing connector ends. Specifically, in lines 55-60, it is disclosed that in one embodiment, the connector may be formed of a stretchable or flexible material which can distort to cover the drug delivery device dispensing end. This would be equivalent to a pliable boot. The snap-fit connector of Gahwiler would find application in any type of tubular coupling between two coupling ends which snap together or one pushes into the other.

### ***Allowable Subject Matter***

Claims 1-9,22 and 23 are allowed.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn K. Dawson whose telephone number is 571-272-4694. The examiner can normally be reached on M-Th 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anhtuan T. Nguyen can be reached on 571-272-4963. The fax phone

Art Unit: 3731

number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
